COURSE TITLE	CALCULUS 1						
Course code	SRC106	Year of study	First				
	Arijana Burazin Mišura,	ECTS	6				
Lecturer(s)	senior lecturer	(Number of credits allocated)					
Associates		Total lesson hours per semester	Lecture 45	Seminar	Practical	Laboratory	
Course status	Core	Percentage share of e- learning					
	COUR	SE DESCRIPTION					
Course Objectives	<ol> <li>understanding of the basic concepts of differential and integral calculus</li> <li>theoretical and practical preparation enabling students to apply the acquired knowledge and skills in professional and specialist courses</li> </ol>						
Course enrolment requirements and entry competencies required for the course	None						
Learning outcomes On successful completion of this course, student should be able to:	<ol> <li>define the basic concepts and principles of differential and integral calculus of real functions and sequences and series</li> <li>interpret the geometric meaning of differential and integral calculus</li> <li>apply the concept and principles of differential and integral calculus to solve geometric and physical problems</li> <li>analyze the properties of functions based on graph</li> <li>organize solving of complex problems by combining the acquired mathematical concepts and principles</li> </ol>						
Course content	Functions The functions of a real variable. Defining and classification, limit, continuity, asymptotes, a review of elementary functions. Computing logarithms and general potency. Exponential equation. Logarithmic equations. Graphing functions. Definition of trigonometric functions. Calculating the value of trigonometric functions. Differential and integral calculus Derivation, differential, multiple derivatives and differentials, mean value theorem, monotony, extremes, curvature, flow testing tool. Integral calculus. Definition of indefinite integrals and basic methods of integration. The concept and properties of definite integrals. Newton-Leibnitz formula, definite integral, applications of definite integrals. Sequences and series A Sequences of real numbers, series of real numbers, function sequences, function series, Taylor and Maclaurin series						
Types of teaching:	<ul> <li>☑ lecture</li> <li>□ seminars and workshop</li> <li>☑ practical</li> <li>☑ combined e-learning</li> </ul>	<ul> <li>self-study</li> <li>multimedia</li> <li>laboratory</li> <li>mentoring work</li> </ul>					

	□ field research			□ (	others)			
Student obligations	Attendance at lectures and exercises in the amount of at least 70% scheduled hours (for part-time students the obligation is 50% attendance).							
Monitoring student work (enter the share in ECTS credits for each activity so that the total number of ECTS credits corresponds to the credit value of the course):	Class attendance	2,5	Research			Practical work		
	Experimental work		Report			Consultations	0,2	
	Essay		Seminar			(others)		
	Self-study	2,8	Workshop			(others)		
	Project		Office hou mid-term exams and final exam	ć	0,5	(others)		
Assessment and	CONTINUOUS ASSESSMENT							
	Continuous testing indicators				Performance <i>A</i> i (%)	Grade ratio <i>k</i> i (%)		
	First mid-term exam					50-100	50	
	Second mid-term exam					50-100	50	
	FINAL ASSESSMENT							
	Indicators checks				Performance <i>A</i> i (%)	Grade ratio <i>k</i> i (%)		
evaluation of	Final exam (written)					50 - 100	50	
student work during classes and at the final exam	Theoretical exam (written and / or oral)					50 - 100	50	
	Indicators checks					Performance <i>A</i> i (%)	Grade ratio <i>k</i> i (%)	
	Final exam (written)					50 - 100	50	
	Theoretical exam (written and / or oral)					50 - 100	50	]
	The grade (in percentages) is formed on the basis of all indicators that describe the level of student activities according to the relation:							
	$Grade (\%) = \sum_{i=1}^{N} k_i A_i$ k <sub>i</sub> - weighting factor for each activity, A <sub>i</sub> - success in percentage achieved for a particular activity, N- total number of activities.							

	PERFORMANCE AND GRADE					
	Percentage	Criteria	Grade			
	50% - 61%	basic criteria met	sufficient (2)			
	62% - 74%	average performance with some errors	good (3)			
	75% - 87%	above average performance with minor errors	very good (4)			
	88% - 100%	outstanding performance	outstanding (5)			
Required reading	1. Rivier K: Zbirka riješenih zadataka II i III, Veleučilište u Splitu (2003)					
Optional reading	<ol> <li>Doščić, T, Sandrić, N: Matematika 1, Građevinski fakultet, Sveučilište u Zagrebu</li> <li>Bruckner, F.M., Pažanin, I: Matematika 1 za kemičare, http://prelog.chem.pmf.hr/~fmbruckler/main1-2012.pdf</li> </ol>					
Quality monitoring to ensure the acquisition of established learning outcomes	<ul> <li>Records of class attendance and success in performing student obligations</li> <li>Updating detailed course curricula</li> <li>Supervision of teaching activities</li> <li>Continuous quality control of all parameters of the teaching process in accordance with the Action Plans</li> <li>Semester-based student survey in accordance with the "Ordinance on the procedure of student evaluation of teaching work at the University of Split" (UNIST, Centre for Quality Improvement).</li> </ul>
